

700-IV Current Shunt

4-20mA Current shunt

Very accurate current shunt to use for verification and calibration of process control loops.

- Can be used with accurate voltmeters for calibration purposes
- Can be used with Fluke 74X series in mA/mA applications (74X will display mA/mA automatically)
- One year warranty

Specifications	
Measurement type	Current shunt
Nominal current range	4 mA - 20 mA
Continuous current range	0 mA - 55 mA
Maximum Non-Destructive Current	55 mA
Lowest measurable current	0 mA
Basic accuracy	0.025% (% reading + floorspec)
Output level(s)	10 mV/A
Safety Specifications	
Safety	30 V
Maximum voltage	30 V
Mechanical & General Specifications	
Warranty	1 year
Shrouded banana plugs	Yes
