

## AUTOTRANSFORMERS

### Description:

Triad autotransformers from Triad Magnetics are single winding transformers in which the primary coil is a fraction of the entire winding for voltage step-up or the secondary coil is a fraction of the entire winding for voltage step-down. (See Technical Notes for an equivalent circuit diagram.) In ordinary double wound power transformers, the primary and secondary are isolated and all the power is transferred by induction. In autotransformers, part of the power is transferred conductively through the windings. Triad autotransformers come in a variety of configurations, case types and output watts (VA) ratings in excess of 2,000 watts. A universal isolation/autotransformer/ voltage control model is available with up to a 4,000 output watts rating when operated as an autotransformer.

You Searched for product number n-3mg.

Product number N-3MG is the associated Triad Magnetics product.

The Triad Magnetics product is highlighted below.

### Specifications:

\* Has 3-wire plug, cord and socket

\*\* 60 Hz

Mounting hole sizes: (1)=3/16" (2)=13/64 x 3/8" (3)=3/8 x 3/16"

**TECHNICAL NOTES:**

1. Output wattage (VA) ratings to 50 to 2,000 W.
2. Wide selection of case types, including 6' line cords, plugs.
3. All transformers are 50/60 Hz line frequency, except as noted.
4. Hi-pot tested at 1,500 VRMS
